WHO WE ARE INTELLIGENCE AS A SERVICE

The world is all about being complicated. There is more and more data, but its volume, unstructuredness, and opacity increase non-linearly. With every growth, doers are less aware of the real business. The more noise, but the less information around.

We deal it with data searching, non-obviousness discovering and operations' managing to make markets more efficient, driven, and issue solved. Enterprises, equity holders, new-born inventors and international organizations partner with us.

OUR APPROACH

THE FUNC IS NOT EQUAL TO THE FUNC'

FUNC' | It is widely believed that ancient buildings and cathedrals, with their wonderful shapes and curves, were inspired by the formal geometry of Euclid. How else could the ancients have built these intricate structures?

FUNC | In fact, geometry played almost no role. As Nassim Taleb shows it is almost certain that the practical wisdom of architects inspired Euclid to write his Book of Elements, so as to formalize that the builders already knew.

OUR DISCLOSED CUSTOMERS

evapolar

The world's first personal air cooler raised \$1M using Indiegogo. Evapolar uses special evaporating plates of a special patented material, which simultaneously works as a pump (soaking water for the entire height) and a vertical water surface.

altairnano

Altair Nanotechnologies Inc. is a company specializing in the development and manufacturing of energy storage systems. It designs advanced lithium-ion energy batteries.

ULMART.RU

Dvigex is an Ulmart's team focused on a SAP enterprise software. It is the Russia's first internet-retailer to exceed \$1 billion in sales. Opened for business only 6 years ago and already showing more dynamic growth than Amazon.

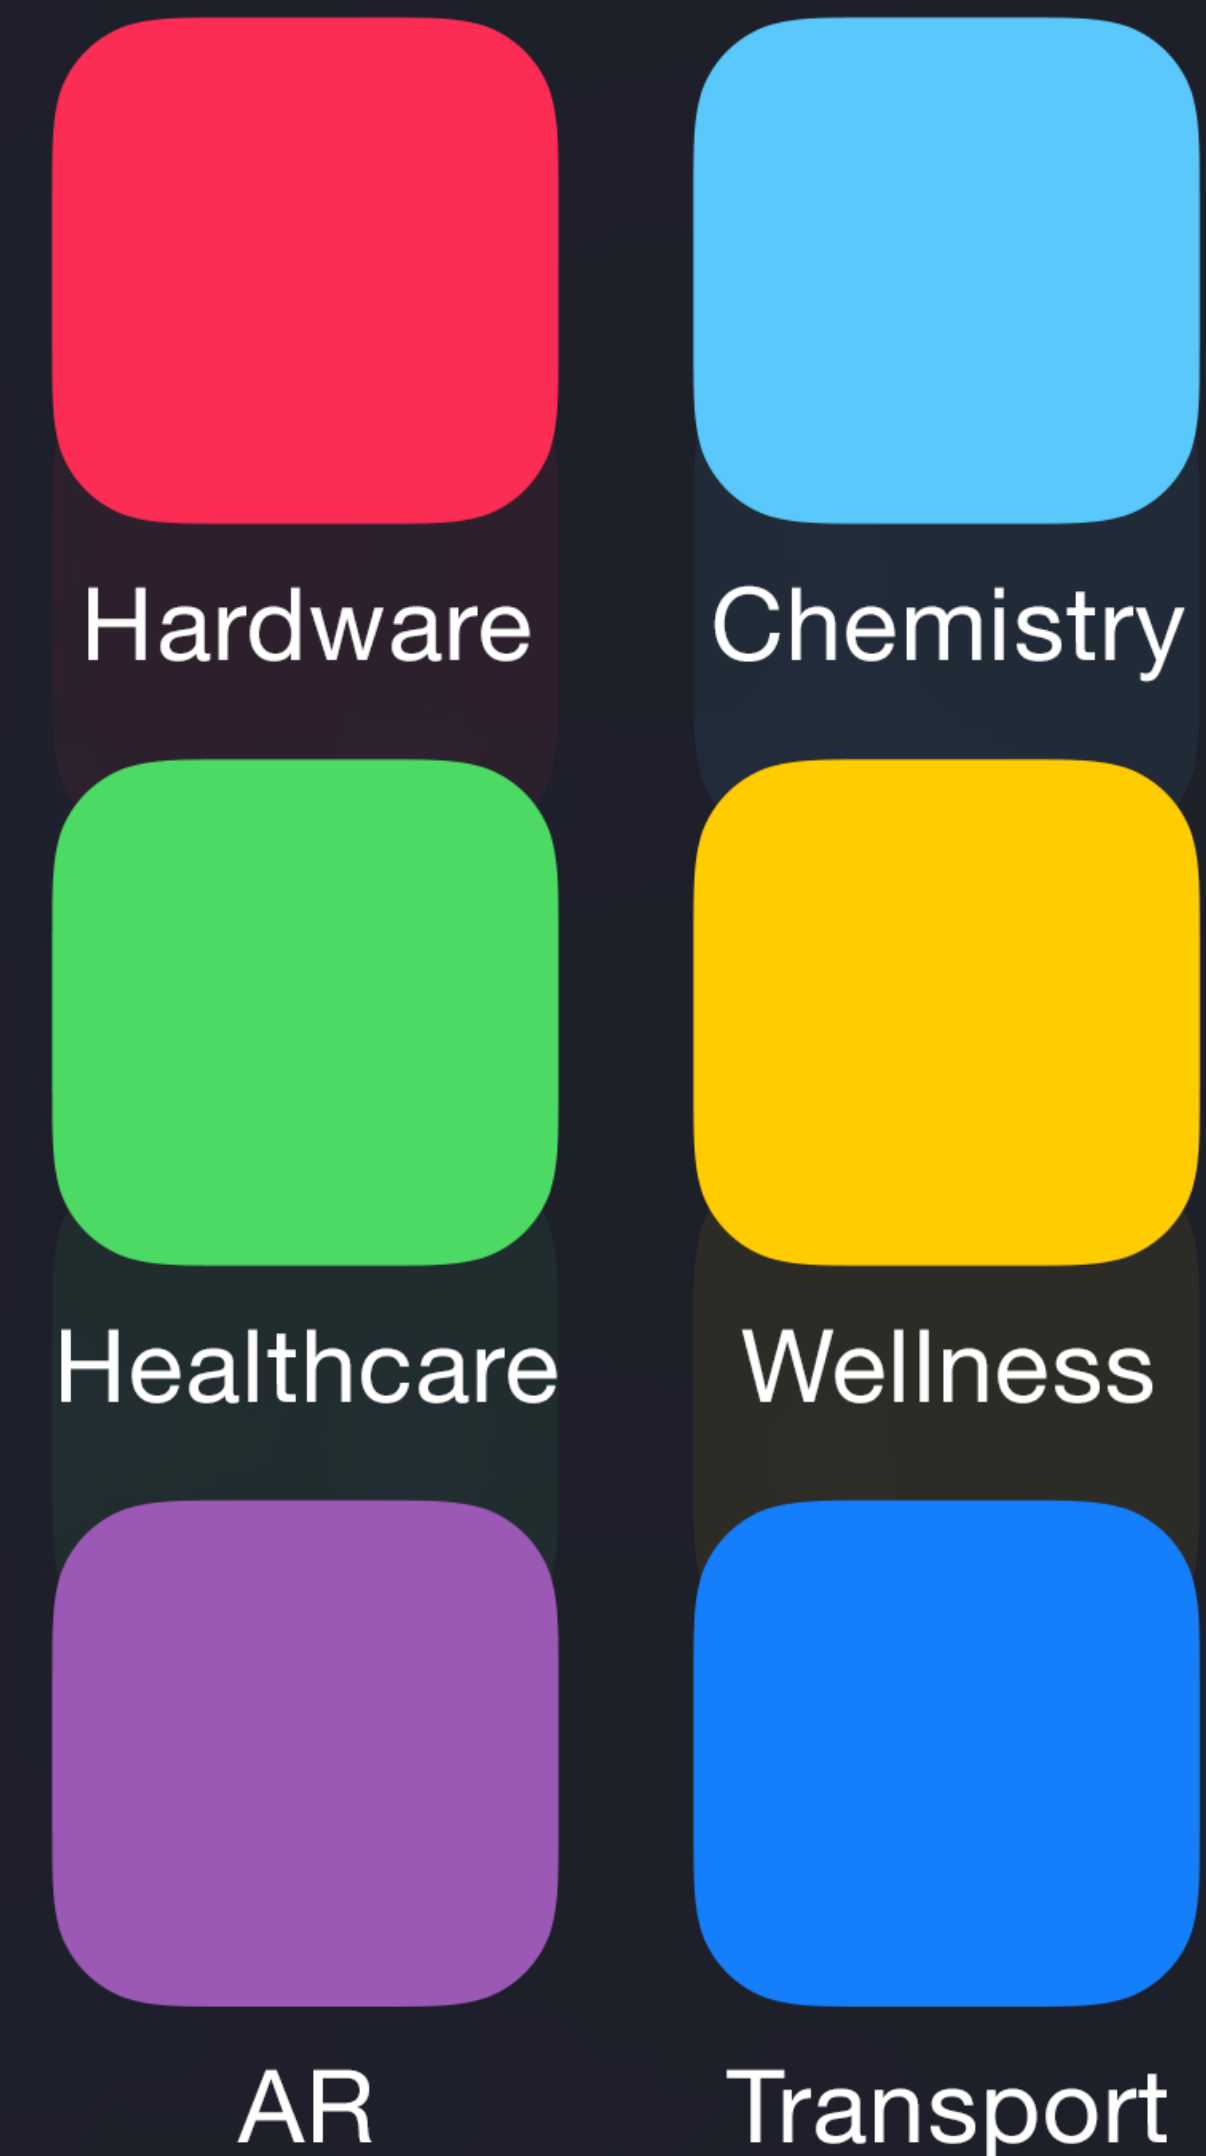

CINEMOOD

It is a pioneer in portable kids computers. Its vision is to become the first computer in human hands, a growing intellect nearby the human.

OUR TECHNOLOGY GRID

Due to our interdisciplinary approach, it has become possible to get a broad international experience. We shape a smart network of innovators all over the biggest economic areas, including hardware, chemistry, healthcare etc.

The agenda is quite simple. Study, try it, share. Hence, we are able to acquire the latest data on technology and equity markets. Our members from the United States, Germany, Estonia, the UK and so on change the way we are living.

BESIDES, WE ARE READY TO HELP YOU WITH

Our business grew out of passion for technology and IoT. The cloud-based analytics platform helps you make sense of retail data and convert it into actionable insights.

A coub is a looped video up to 10 seconds long. Capture a moment with a tiny bit of motion and create the illusion of a moving photograph.

Our mission is to help farmers manage productivity and, as a result, increase the profitability of their fields using effective, affordable, and evolving IT-solutions.

Identify the media playing around you, explore the music you love. Discover song lyrics from your favourite artists on Shazam.
