WHO WE ARE
INTELLIGENCE AS A SERVICE

The world is all about being complicated. There is more and more data, but its volume, unstructured-ness, and opacity increase non-linearly. With every growth, doers are less aware of the real business. The more noise, but the less information around.

We deal it with data searching, non-obviousness discovering and operations' managing to make markets more efficient, driven, and issue solved. Enterprises, equity holders, new-born inventors and international organizations partner with us.

THE FUNC IS NOT EQUAL TO THE FUNC'

FUNC'/ It is widely believed that ancient buildings and cathedrals, with their wonderful shapes and curves, were inspired by the formal geometry of Euclid. How else could the ancients have built these intricate structures?

FUNC/ In fact, geometry played almost no role. As Nassim Taleb shows it is almost certain that the practical wisdom of architects inspired Euclid to write his Book of Elements, so as to formalize that the builders already knew.

OUR DISCLOSED CUSTOMERS

evapolar

The world's first personal air cooler raised $1M using Indiegogo. Evapolar uses special evaporating plates of a special patented material, which simultaneously works as a pump (soaking water for the entire height) and a vertical water surface.
